Economic. Electric. Eco Logic.

COMPANY TrybEco is the polish e-bikes and e-scooters brand. Trybeco means both, products and philosophy of living in the city. Products and legend.

Enter TrybEco. Live easy, clean and creative. Switch to e-scooter or hybrid bike. Feel the freedom of traveling, choose your own style and discover new technologies. Do it for yourself. And on the occasion, without any effort you will do something for your city and our planet.

TrybEco Philosophy is not only about e-bikes and e-scooters. This is our way of thinking and lifestyle.

- **We want to live different: clean, easy and peacefully.** We don't like dirty engines and noise. We appreciate harmony, contact with nature and the feeling of wind on our face.
- **Design is important.** The look matters and it is the part of our human individuality. We express ourselves this way, and we love to surround ourselves with esthetic products.
- **We are keen on savings.** If we can save some money or energy, we do it. At least because we can use surpluses to realize our passions.
- **We don't compromise on quality.** Technology gives us the possibility to create better and better quality, we are passionate about new technologies. For us ecologic and economic doesn't mean „just any”. We are definitely against „just any” products.
- **Commitment.** We have created TrybEco out of our passion and experience. We believe, we are responsible for the place we live in.

WHY CHOOSE TRYBECO?

- Best quality to price ratio
- Modern design and esthetic details
- Full Customization according to customer's needs
- Certifications for all the equipment
- Only Li-Ion batteries
- Continuous surveillance and quality control
- Selected financing and insurance options

WHY TRYBECO IS ECO?

- Our e-bikes are the real alternative for cars and normal scooters, also in everyday travels to work or school, and this is their main advantage in terms of ecology and health.
- Versatility of applications. E-bike broadens the possibilities of normal bike for everyone, regardless of the age and other limitations.
- Electrical energy is „clean”. Our products doesn't pollute the air, or create the noise.
- Brushless engine and Li-Ion batteries. The most advanced, clean technologies.
- Intelligent Chargers - stop working as soon as the battery is full
- Unique and innovative placement of the battery in the hub. This technology help us to create superb design, but also lowers the center of gravity and equally distributes the masses of the engine and battery between front and rear wheels. What is more it even helps the rider as the rotating battery supports the wheel turning force.
- All our products are in accordance with the European Laws, they meet the EC, EN11594, and other required regulations
- Our product are the part of the new coming philosophy of „smart cities”, they are very important alternative method of transportation in modern world

E-BIKE OR E-SCOOTER?

Choose for yourself. Would you like to move faster, more comfortable, and take more stuff with you on your e-scooter, or maybe you would like to burn more calories, be more fit and you simply love bikes? Below you can see our reasons and advantages. Of course you can add yours, as you know better what is important for you.

TRYBECO E-SCOOTER:

- **Silence.** Almost no audible engine sound, you can perfectly hear what you want to hear.
- **Clean and Easy.** Our e-scooters don't have any „dirty”, complicated mechanical parts, the electrical engine is integrated inside the wheel, you will always have clean hands and clear mind.
- **Faultless.** It doesn't brake. Simply there's nothing that can go wrong.
- **Money saving.** E- scooter is a lot cheaper, you will need only about half euro for every 100 km. Full charge keeps you driving about 100 km.*
- **Integration with smartphone.** We have the app for you, that helps you manage and communicate with your e-scooter. What's more you can listen to your favorite music directly from your music library on the ipod or smartphone.
- **Light construction.** E-scooters are about 50% lighter than normal one. That's why it's easier to ride or park.
- **Respect for the environment.** Don't generate any exhausts, CO2 or noise.
- **Design.** Look matters. Our products are created by selected designers
- **Smart City.** You take part in creating new city, healthier, less traffic and noise.

TRYBECO HYBRID BIKE:

- **More flexible.** You can go long distances and faster using the same strength and energy.
- **Freedom of choice.** You can use only your muscles, when you want. You can switch to electric engine support whenever you'll need it.
- **Comfort.** It's easier to ride, lighter more comfortable than normal bike.
- **Support.** You can ride all day without the support, but the fact that it is there waiting, will make you feel secure, especially on long distances.
- **Weight.** Our Heavy Duty hybrid bikes line, are the best solution for the special tasks: for the heavy terrain, intensive riding and heavy weights.

TRYBECO AND SMART CITY. RENTAL/SHARING SYSTEMS.

Thanks to our products we can improve the level of mobility in the cities. Our products are one of the solutions for building pro-ecological attitudes in the modern world.

We offer innovative E-scooters/E-bike Rental/Sharing system.
